

Postdoctoral Position in Biostatistics

HEC Montreal/University of Minnesota

A postdoctoral fellowship is available in statistical genetics, or in machine learning with applications in genetics, with emphasis on Bayesian matrix factorization for genomic data imputation. The successful candidate will work with Dr. Aurélie Labbe and Dr. Thierry Chekouo, either at HEC Montréal (Department of Decision Science) or in the School of Public Health, Division of Biostatistics, at the University of Minnesota, Minneapolis.

Qualified applicants should have: a completed or nearly completed PhD in Statistics, Biostatistics or related fields, excellent oral and written communication skills, and exceptional computing skills using R statistical software or Python. Knowledge and expertise in genetics is an asset but not required.

The salary is based on the applicant's qualifications and will be competitive. To apply, please submit the following documents to Dr. Aurélie Labbe (aurelie.labbe@hec.ca) and Dr. Thierry Chekouo (tchekouo@umn.edu).

- (1) letter of interest
- (2) curriculum vitae
- (3) graduate courses taken, and grades obtained
- (4) sample publications
- (5) the names and contact information of three references

Screening of applications will begin immediately and will continue until the position is filled. All applicants are thanked in advance; only those selected for further consideration will receive information about the interview process.
